# CKAN
## DATA MANAGER

The CKAN Data Manager is a tool that enables individual government agencies to upload, update and maintain their respective data themselves which makes the process easier and more manageable for both the Open Data Task Force and the individual government agencies.

## FEATURES

Enables the individual government agencies to submit or update their public data

Enables the Open Data Task Force to review the agencies' submitted data

Agencies are able to receive feedback from both the Task Force
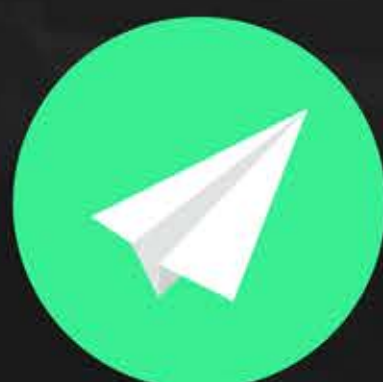

## DID U KNOW?

## HOW IT WORKS

**STEP 1**
Government Agency creates a new dataset

**STEP 2**
Government Agency submits the dataset for review

**STEP 3**
Open Data Task Force reviews submission

**STEP 4 (WITH ERROR)**
